Trauma Care (Thorax and Limbs Session)

Pre-session rating

On a scale of 1-5, please rate your current knowledge of the following areas

(1 = Poor, 5 = Excellent):

How well do you understand the anatomical relationships of thoracic and abdominal organs in trauma situations?

Poor ——————————————— Excellent

☹ 1 2 3 4 5 ☺

How familiar are you with identifying major vessels and landmarks in the upper and lower limbs in the context of bone fractures.

Poor ——————————————— Excellent

☹ 1 2 3 4 5 ☺

How confident are you of your knowledge of the range of motion and injury risks associated with the knee, hip, elbow and shoulder joints?

Poor ——————————————— Excellent

☹ 1 2 3 4 5 ☺

Trauma Care (Anatomy Session) – Feedback 25

Informed Consent

Do you consent to the collection and use of your responses for evaluation and possible research purposes?

Yes, I consent ☐ No, I do not consent ☐

Age

Under 16 ☐ 16-20 ☐ 21-25 ☐ 26-30 ☐

31-35 ☐ 36-40 ☐ 41-45 ☐ ≥46 ☐ Prefer not to say ☐

Which term describes your ethnic group?

Indian	White Irish
Pakistani	White Irish Traveller or Gypsy
Bangladeshi	Any other White background
Chinese	White and Black Caribbean
Any other Asian background	White and Black African
African	White and Asian
Caribbean	Any other Mixed or Multiple ethnic background
Any other Black, African or Caribbean background	Arab
White British	Prefer not to say

I prefer to self-describe my ethnic group _____

Do you consider yourself to have a learning disability?

Yes ☐ No ☐ Prefer not to say ☐

Which term describes your gender?

Male ☐ Female ☐

Non-binary ☐ Prefer not to say ☐

I prefer to self-describe my gender _____

What is your course of study? _____

Have you attended a trauma-focused anatomy practical session before? Yes ☐ No ☐

Post-session Rating

On a scale of 1-5, kindly rate your knowledge on the following areas after this session (1 = poor, 5 = excellent)?

i. Anatomical relationships of thoracic and abdominal organs in trauma situations?

Poor ☹ 1 2 3 4 5 ☺ Excellent

ii. Ability to identify major vessels and landmarks in the upper and lower limbs in the context of bone fractures.

Poor ☹ 1 2 3 4 5 ☺ Excellent

iii. Knowledge of the range of motion and injury risks associated with the knee, hip, elbow and shoulder joints?

Poor ☹ 1 2 3 4 5 ☺ Excellent

Learning methods & Tools

How engaging, effective and helpful did you find the following learning resources used in this session: (1 – not helpful, 2- slightly helpful 3- neutral, 4 – helpful, 5 – very helpful)

	1	2	3	4	5
Anatomage games and pathology visualisation					
Clinical case role-play scenario testing communication skills					
Palpating real bones and models					
Identifying cadaveric structures					
Wordsearch puzzle in familiarising anatomical terminology					
The use of Complete Anatomy to explore joint movements and fracture					

Which activity or tool in today's session contributed most to your understanding of trauma anatomy, and why?

What could be improved in this session?

Others

How likely are you to use the knowledge from this session in your trauma practice?

Very unlikely ☹ 1 2 3 4 5 ☺ Very likely

What specific concept from this session do you feel prepared to apply in real-life scenarios or practice?

Regarding your tutor: Please select 1-5 as appropriate. 1 = strongly disagree, 2 = disagree, 3 = neutral, 4 = agree, 5 = strongly agree.

Your tutor:	**1**	**2**	**3**	**4**	**5**
Communicated ideas & concept clearly					
Encouraged student participation and interaction					
Responded to questions and concerns					
Guided you through the hands-on activities					
Made the session interesting & engaging					

Share any over satisfaction and additional thoughts or comments about this session, if you wish.

Trauma Care (Neurological trauma Session)

Pre-session rating

On a scale of 1-5, please rate your current knowledge of the following areas

(1 = Poor, 5 = Excellent):

How well do you understand the anatomical differences between cervical, thoracic, lumbar, and sacral vertebrae, and how these differences influence fracture stability?

Poor ——————————————— Excellent

☹ 1 2 3 4 5 ☺

How familiar are you with identifying the cranial cavity, cranial nerves and effects of increased intracranial pressure that might lead to brain herniation?

Poor ——————————————— Excellent

☹ 1 2 3 4 5 ☺

How confident are you in identifying the protective layers of the brain and spinal cord, common bleed locations, and their correlation with possible trauma cases?

Poor ——————————————— Excellent

☹ 1 2 3 4 5 ☺
