Dear Jemima Chukwu Shaibu ,

RE: Developing and Evaluating Multi-Approach Applied Anatomy Teaching Resources

Application for Ethical Review: ERN_5382-Nov2025

You project has been considered in line with the University of Birmingham's research ethics processes and on the basis of the information you have provided, it is understood that while your project does involve human participants, the project raises no substantial research ethics issues and therefore no further ethics review is required

Any adverse events occurring during the study should be promptly brought to the Committee's attention by the Principal Investigator and may necessitate further ethical review.

Please ensure that the relevant requirements within the University's Code of Practice for Research and the information and guidance provided on the University's ethics webpages are adhered to.

Please be aware that whilst Health and Safety (H&S) issues may be considered during the ethical review process, you are still required to follow the University's guidance on H&S and to ensure that H&S risk assessments have been carried out as appropriate. For further information about this, please contact your School H&S representative or the University's H&S Unit at healthandsafety@contacts.bham.ac.uk.

Kind regards,

The Co-Chairs of the Science, Technology, Engineering and Mathematics Committee
