Supplementary Table 1. Thematic coding of participant free-text comments

Data source and coding note: This supplementary table presents responses collected from two post-session questionnaire questions: "*What activity or tool in today's session contributed most to your understanding of trauma anatomy, and why*?" and "*Share your overall satisfaction and any additional thoughts or comments about this session, if you wish*." Responses recorded as "NA", "Nil" or "None" were excluded as non-responses. All remaining comments were retained and coded once according to their dominant meaning, with participants' original wording preserved, including spelling and typographical errors.

Five-theme coding framework

Theme	Theme label	Coding scope
Theme 1	Hands-on engagement with real anatomy supported anatomical understanding	Cadaveric/preserved specimens; palpation, bones/models; identification/flags/labels; real anatomical context.
Theme 2	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Anatomage/app/digital tools; diagrams/images; preparatory and station-based resources.
Theme 3	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular/spinal anatomy; pathology/procedures; case-based links to real injuries.
Theme 4	Facilitation, interaction and collaborative learning supported engagement	Tutor/facilitator input; group work/discussion; interactive and engaging delivery.
Theme 5	Overall acceptability and perceived value of the session	Positive appraisal, appreciation, usefulness/informativeness and desire for longer or repeat sessions.

Theme count summary

Theme	Number of coded comments
Hands-on engagement ~~with real anatomy~~ supported anatomical understanding	33
Multimodal and technology-enhanced resources enriched trauma anatomy learning	11
Trauma-focused anatomy, pathology and clinical application	10
Interaction and collaborative learning supported engagement	11
Overall acceptability and perceived value of the session	24
Total coded comments	**89**

Full supplementary coding table

ID.	Theme	Subtheme	Participant comment
1	Hands-on engagement with real anatomy supported anatomical understanding	Palpation, bones/models and tactile handling	Palpating real bones and models. Identifying cadaveric structures.
2	Interaction and collaborative learning supported engagement	Facilitator/tutor input	Session facilitator
3	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	use of cadaveric specimen
4	Trauma-focused anatomy, pathology and clinical application	Pathology, procedures and clinical application	Subdural hematoma
5	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	Identifying the flags
6	Hands-on engagement with real anatomy supported anatomical understanding	Palpation, bones/models and tactile handling	Palpations of real bones and models helped me visualise
7	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Being able to physically see and move cadavers to fully understand function
8	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	looking at cadavers, flags and interacting with them
9	Interaction and collaborative learning supported engagement	Facilitator/tutor input	interacting and explaining the specimens
10	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	Demonstration of idenifying features on cadaver
11	Overall acceptability and perceived value of the session	Desire for longer or repeat sessions	All but needed longer
12	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Anatomage/app/digital anatomy tools	the app
13	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	Specimens to put into perspective
14	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	using cadaveric structures with labels to identify them
15	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	looking at real life organs and joints
16	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Observing th ehuman cadavers
17	Hands-on engagement with real anatomy supported anatomical understanding	Palpation, bones/models and tactile handling	the anatomy of the body being able to touch it

Supplementary thematic coding table

ID.	Theme	Subtheme	Participant comment
18	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Anatomage/app/digital anatomy tools	Anatomage games
19	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	identifying cadaveric strutures
20	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	exploring anatomy on real life organs/limbs
21	Interaction and collaborative learning supported engagement	Interactive and engaging delivery	very realistic. Interactive
22	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	thoroughly enjoyed every aspect
23	Hands-on engagement with real anatomy supported anatomical understanding	Palpation, bones/models and tactile handling	hands on, real bones and strutures
24	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	the cadaveric structures. Great to see real size/structure
25	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	anatomy dissection
26	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	Hands-on with specimens, using flags to label specimen.
27	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	specimens
28	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	all the specimen
29	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	specimen relatetaibility
30	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	specimen with preserved specimen (human)
31	Trauma-focused anatomy, pathology and clinical application	Pathology, procedures and clinical application	anatomage for learning epidural injection and pathology
32	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	the specimen
33	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular and spinal anatomy	seeing the brachial plexus
34	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Diagrams/images and visual resources	diagram images of the cadaver
35	Trauma-focused anatomy, pathology and clinical application	Pathology, procedures and clinical application	nerves. Helpful for evidence based practice
36	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Preparatory/station-based resources	pre-session activity

Supplementary thematic coding table

ID.	Theme	Subtheme	Participant comment
37	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Preparatory/station-based resources	station 1 and 2 of neuro
38	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Diagrams/images and visual resources	diagrams and real life samples
39	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	real structures
40	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Preparatory/station-based resources	combination of all
41	Hands-on engagement with real anatomy supported anatomical understanding	Real anatomical context, size and relationships	visualising structures all together
42	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular and spinal anatomy	brain on table 5, spinal cord
43	Trauma-focused anatomy, pathology and clinical application	Case-based links to real injuries	case studies because it links with theory and real life injuries
44	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular and spinal anatomy	brain
45	Hands-on engagement with real anatomy supported anatomical understanding	Palpation, bones/models and tactile handling	palpating real bones and models
46	Interaction and collaborative learning supported engagement	Group work and discussion	The instructors, Group discussion, the structures
47	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular and spinal anatomy	Seeing structures of brain + spinal cord
48	Interaction and collaborative learning supported engagement	Facilitator/tutor input	The teaching + real organs
49	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Anatomage/app/digital anatomy tools	The anatomage
50	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Cadeveric structures - real handling
51	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Anatomage/app/digital anatomy tools	Practical and anatomage
52	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	Identifying real life structures
53	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Anatomage/app/digital anatomy tools	BD Anatomy
54	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Seeing the real Human anatomy
55	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular and spinal anatomy	Identifying blood vessels & circles of wills

Supplementary thematic coding table

ID.	Theme	Subtheme	Participant comment
56	Multimodal and technology-enhanced resources enriched trauma anatomy learning	Preparatory/station-based resources	Section3
57	Trauma-focused anatomy, pathology and clinical application	Neurotrauma/neurovascular and spinal anatomy	Spinal vertebrae + where they're located in real life
58	Hands-on engagement with real anatomy supported anatomical understanding	Identification, flags and labels	Identifying structures on cadavers
59	Interaction and collaborative learning supported engagement	Group work and discussion	Group work and discussion
60	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Cadaveric structures
61	Interaction and collaborative learning supported engagement	Group work and discussion	lab session & group discussion
62	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Real cadaver
63	Hands-on engagement with real anatomy supported anatomical understanding	Appreciation of cadaveric/preserved specimens	Donors helped see real anatomy
64	Overall acceptability and perceived value of the session	Appreciation/thanks	Thank you
65	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Excellent session
66	Overall acceptability and perceived value of the session	Appreciation/thanks	Thank you
67	Overall acceptability and perceived value of the session	Desire for longer or repeat sessions	hope to do it again
68	Overall acceptability and perceived value of the session	Perceived usefulness/informativeness	Very informative and engaging
69	Interaction and collaborative learning supported engagement	Interactive and engaging delivery	It was a new experience, useful and interactive
70	Overall acceptability and perceived value of the session	Appreciation/thanks	thank you
71	Overall acceptability and perceived value of the session	Appreciation/thanks	thanks
72	Overall acceptability and perceived value of the session	Appreciation/thanks	thank you
73	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	fantasic session!
74	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Great work! Thank you
75	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Happy
76	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Great session! Thank you
77	Overall acceptability and perceived value of the session	Perceived usefulness/informativeness	very useful session
78	Interaction and collaborative learning supported engagement	Interactive and engaging delivery	session was very interactive, visual and auditory learning
79	Overall acceptability and perceived value of the session	Perceived usefulness/informativeness	very informative

Supplementary thematic coding table

ID.	Theme	Subtheme	Participant comment
80	Interaction and collaborative learning supported engagement	Facilitator/tutor input	well run session. Very helpful tutor
81	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Great session
82	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	very good
83	Overall acceptability and perceived value of the session	Perceived usefulness/informativeness	very good time & learning
84	Overall acceptability and perceived value of the session	Perceived usefulness/informativeness	Thank you / Very informative
85	Overall acceptability and perceived value of the session	Perceived usefulness/informativeness	All aspects were great & very formative. Great session
86	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Brillant session
87	Overall acceptability and perceived value of the session	Appreciation/thanks	Thank you!
88	Interaction and collaborative learning supported engagement	Facilitator/tutor input	Dr Izu was great and taught us in details at the anatomage room. Very great session
89	Overall acceptability and perceived value of the session	Desire for longer or repeat sessions	Very good session. Should be a full day!
90	Overall acceptability and perceived value of the session	Positive general appraisal/appreciation	Throughly enjoyed!
